### **Tinker**

*Co-Creator, Software Engineer*

Tinker is an open-source backend-as-a-service (BaaS) that automates deployment on AWS and accelerates development through a database editor UI.

- Created a CLI to automate the provisioning & management of AWS infrastructure
- Designed and Implemented Tinker's infrastructure including networking and security
- Centralized TLS certificate management and HTTPS communication through SSL offloading
- Secured Tinker through authentication with JWTs and authorization with PostgreSQL roles
- Engineered automatic provisioning of PostgreSQL and an API layer in EC2 instances using Docker
- Built a responsive dashboard UI with React.js & tailwindcss
- Developed RPCs for dashboard SQL queries (DDL and DML)
- Co-authored Tinker's case study
